

Welcome to Our Venture Studio World

NE➤**T MOBILITY LABS**

**We are your partner in
building and scaling
mobility companies.**

Dear Mobility Enthusiasts,

We are living in a time that requires urgent action and change.

Innovation is not an option—it is a necessity.

The transformation of the energy sector has shown what is possible: In just one decade, solar and wind power have gone from the most expensive to the cheapest energy sources. The mobility sector is next. The transition to sustainable mobility is not just an environmental imperative—it is one of the biggest economic opportunities of our time.

Sustainable mobility is a multi-trillion-dollar market, and Next Mobility Labs is driving this transformation with cutting-edge technologies. We partner with visionary founders, industry leaders, and investors to create the next generation of mobility startups.

If you want to shape the future with us—whether as an investor, a strategic partner, or a co-founder—let's connect. Now is the time to act.

A handwritten signature in black ink that reads "Armin Bieser". The script is fluid and cursive, with the first letters of "Armin" and "Bieser" being capitalized and prominent.

Armin Bieser

Co-Founder of Next Mobility Labs

Propelling the next-level mobility ecosystem.

As a Venture Studio we develop scalable technology ideas into profitable products for future sustainable mobility businesses.

Research tech innovations for sustainable mobility worldwide.

Participate as a co-founder with selected idea providers or as an early-stage investor at Next Mobility Labs.

Scale these start-ups into profitable companies together with the founders.

A portrait of Dr. Peter Mertens, a middle-aged man with glasses, wearing a dark blue suit jacket over a light blue button-down shirt. He is seated at a wooden desk, looking down at a pen in his hand. The background is a plain, light-colored wall.

Dr. Peter Mertens

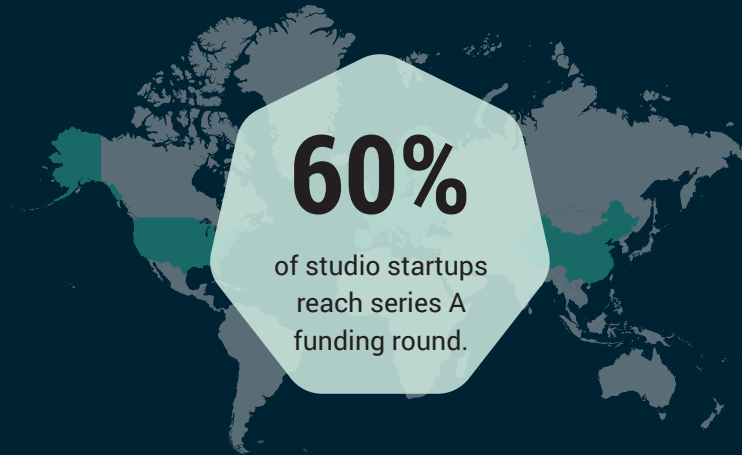

Ex-CTO Volvo /

Ex-CTO Audi

“I’ve invested with Next Mobility Labs to build unicorns in the mobility industry with purpose-driven, hands-on collaboration.”

Venture studios are able to generate **higher added value.**

As a venture studio, Next Mobility Labs profit from the co-founder shares multiple and a diverse portfolio.

Venture Studio & Venture Capital – How Do They Compare?

A venture studio creates companies from scratch. Thus, it receives co-founding equity and benefits from the full value increase of these shares. Being successful, it achieves a higher rate of return than a VC, in a shorter time*.

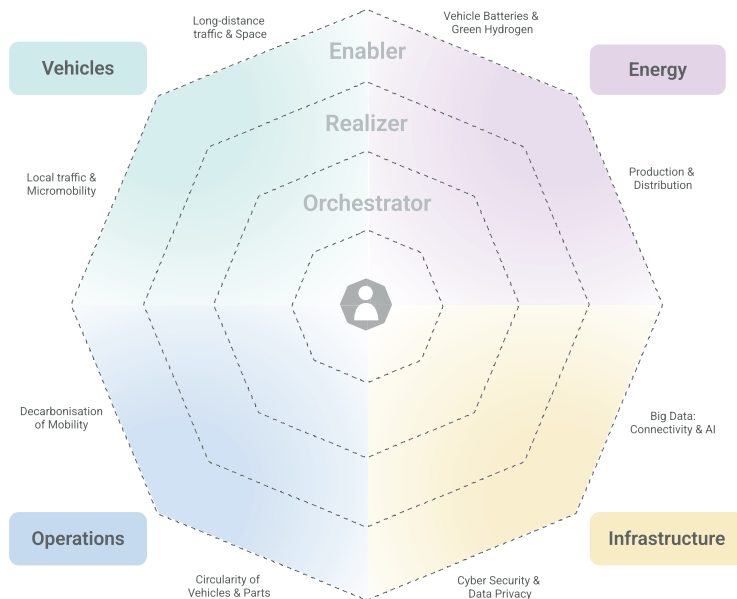

Our playground: The next-level mobility ecosystem.

Software-defined, electrified vehicles. Data seamlessly shared, analyzed, and optimized by AI. **We invest in pioneers who shape this ecosystem**—leveraging cutting-edge technology, new business models, and scalable processes to drive the future of mobility.

Orchestrators offer products or services to end customers (e.g. Getyourdrive)

Realizers create products or services and provide them for end customers (e.g. Mercedes)

Enablers support Realizers and Orchestrators with products or services (e.g. Circunomics, Pionix)

Our expertise and network pave the way for **scalable, successful ventures.**

At Next Mobility Labs, we don't just invest—we build. From early-stage development to exit, we actively shape the future of mobility.

With deep industry expertise, we provide strategic insights, resources for MVP development, and critical financing guidance. Our network of investors, customers, and advisors accelerates growth and market access.

Our hands-on approach reduces risk and increases the chances of building scalable, successful ventures.

Forward thinking, passion and focus on sustainable mobility make Next Mobility Labs **unique.**

At Next Mobility Labs, startups gain access to top-tier advisors—former leaders from the automotive and tech industries. Their expertise helps founders navigate challenges, scale faster, and succeed in the market.

For investors, this means becoming part of a community that shares their industry knowledge, investment mindset, and commitment to building high-value mobility ventures.
